4 Casino Gambling Strategies That Every Gambler Should Know!

If you are like most casino gamblers you want to know how to win the big money! Well I can share with you some serious advice on free winning casino tips and ideas to boost your wins and lower your losses. If you really want to win you have to follow this advice!

Free winning casino strategy #1 - Although there is a way to work the slot machines, I admit that you shouldn't play the slots. Unless you know of the exact payouts of a machine, or know how to find the better paying slots then I would recommend you avoid the slot machines when gambling for profit!

Free winning casino strategy #2 - The best game to play to win at the casino is none other than blackjack. When you take the time to learn card counting strategies you will increase your odds of winning at the casino even more. Being able to predict the cards that the dealer will pull gives you a better power over the game.

Free winning casino strategy #3 - Most of the table games are worth playing over the slot machines. One in particular that sticks out is none other than poker. If you can find some winning methods on poker and study the game inside and out you will make more money from the casino players naturally.

Free winning casino strategy #4 - Whatever you do, never invest into a table game that you don't completely understand. Be sure to study and understand the games you are playing. If you don't, you can fall for foolish bets and actually lose more money than you win.

4 Winning Slots Secrets Learned From A Jackpot Slot Machine Player That Has Won 5 Times..

Within this special article I will teach you blackjack tips you can follow to win more easily while decreasing your losses. Ultimately the very best way to win at black jack is card counting but I will share some simple strategies and ideas to win more money here:

Free basic blackjack rules #1 - If you are holding in your hand of cards an 8, 9, or 10 and the dealer has pulled a 2, whatever you do do not double down! The blackjack dealer has higher odds of not busting and actually getting a higher pull of cards then you. Don't fall for this trick!

Free basic blackjack rules #2 - Do not get sucked into buying blackjack insurance. You should only ever use blackjack insurance if you are holding a 20 or 21. That is it, anything less is not worth it and you will end up losing more money with this bet.

Free basic blackjack rules #3 - This is probably one of the most controversial techniques but it works anyways. I say hit on 16's. You have that small edge of hitting a small card giving you a 20 or 21. Otherwise you could lose without taking that extra chance standing on 16.

Free basic blackjack rules #4 - If you have hit two of the same cards, I say split the cards into two games but never go further into 3 or or more games. If you end up losing 2 bets when you split into 2 you lost big money. If you do a third time it could kill your bankroll splitting into 3 games.

4 Methods To Cash Out More At Casino Blackjack!

Within this special article I will show you 4 different techniques to win at the the game of 21 more frequently. If your goal is to boost your wins and minimize your losses I have a collection of killer tips you will enjoy. Follow these methods to play the game of 21 and watch your profits explode!

Winning casino blackjack strategies - If you are ever asked to double down while the dealer is holding a 2, 3 or 4 and you happen to be holding a 9, 10 or 11 don't! This is a silly bet and many people make it. Simply because the dealer has higher odds of flipping out lower cards and getting a higher score than you!!

Win at blackjack strategy - If you don't know how to play the game of 21, including basic strategy and a little bit of card counting don't bother playing this game. If you don't know how to get the lowest edge against the dealer at the table don't bother losing money trying to figure the game out. Study it first.

Winning casino blackjack strategies - Don't ever fall for the trap of buying into blackjack insurance. It is a suckers bet unless and only unless if you are holding a 20 or a 21. In most casinos you will be paid 3:1 if you have a 21 and pay insurance, but anything less than a 21 or 20 is not worth insuring. Trust me!

Win at blackjack strategy - Always and I mean always, play with basic blackjack strategy. You can usually pick these up at any casino or download them from online. You have to know which bets to make and which to avoid to get the most bang for your dollar!
